

Biography

Gema Revuelta, deputy director of the Observatory of Scientific Communication and coordinator of the Master's in Scientific, Medical and Environmental Communication at the University Pompeu i Fabra, Barcelona. She is a professor at the University for more than 20 years. With a degree in Medicine and Surgery and a master's degree in scientific communication, Revuelta has served as scientific popularization in virtually all media (television, press, radio, multiple digital media...) and has participated in numerous research papers in the field of Science and Society. As a result of this investigation, has published in journals such as *Nature Biotechnology*, *JAMA*, *Science Communication*, *JCOM*, *Medicina Clínica*, *Gaceta Sanitaria*, etc. Currently heads the European project HEIRRI (on the teaching of the RRI at universities) and various research projects, among which is a project funded by the FECYT, which analyzes the perception of scientists about the audience. Gema Revuelta is a researcher of the project "The online video as a tool for communicating science," coordinated by the University of Navarra.
