

Biography

Manuel Barrera Viera, Presidente Colegio Profesional Ambientólogos Andalucía, Sevilla.

Professional in the area of Consulting and energy, with more than 10 years of experience leading multidisciplinary teams, with an interest in positions of responsibility and decision-making within the areas of innovation, planning and strategy. Provided experience in the search for solutions geared to meet the needs of the customer. Generalist profile and may cover a wide range of posts at various corporate areas. Enterprising attitudes and able to take risks. With excellent communication skills, responsibility, proactivity and high commitment in the challenges posed.

Today, one of my challenges is the collaboration as a consultant in the Integrated Sustainable Urban Development Strategies. Also, currently, he worked in the Corporate Social Responsibility in companies of the industrial fabric, especially under the GRI-G4 parameters in the annual sustainability reports. I am currently President of the Professional Association of Graduates in Environmental Sciences of Andalusia. COAMBA. Elected position in the corporation of public law. I have my own company, NEC energies, with the save energy in the industry through renewables.

In addition to purely commercial and engineering work at other companies, I have been for more than 5 years as Director General of Cenit South projects and facilities, a leading company in the sector of turnkey projects of renewable energies in Andalusia.

With regard to my training, I am degree in Environmental Science from the University of Jaén, I have made the Master's degree in City and Sustainable Architecture at the University of Seville, the upper course of the EOI Business School, in Renewable Energy and Energy Market , and also the Master in Coaching staff and the Executive Board of the HPI (Institute of Human Potential).

I have developed EPC projects with companies such as Fagor, Renault, Axion, Dragados, L'Oreal, APM-Terminals, Don Simon, etc., with normal responsibilities as promotion and Commercial Management, Coordination of teams and project management.

These projects have been starring PV Own consumption in industries, Led for lighting, biomass and solar trigeneration, all results of 0 emissions savings of fixed costs, improving the energy efficiency in facilities, in addition to the achievement of the corresponding financing.

I have worked as an external consultant to develop projects of energy improvements in the building with the study of sustainable architecture.

Specialties: Integrated Sustainable Urban Development (DUSI), CSR, Sustainability, Energy Efficiency, Renewable Energy, Coaching, Innovation, Coordination and Management of Projects, Negotiation and Public Speaking. Address of computers.
